EXPERIENCE

Zuri *(Fullstack Developer)*

- Collaborated with my team members on a workspace communication tool like Slack.
- Built Application using HTML5, CSS3, Javacsript for the Frontend and Python(Django) on the Backend
- Developed user friendly web pages that are clean, sharp and responsive.
- Translated UI/UX design wireframes to production ready codes.

KodeCamp *(Frontend Developer)*

- Collaborated on Frontend projects
- Build responsive Web Applications using markup languages like HTML, CSS, Javascript

PROJECTS

KodedTravels

A Web App aimed at making travels more easier and fun

- In the course of this project, I oversaw a team of 7 Frontend Developers.
- We made use of HTML, CSS in building the website and Javascript for functionality.
- Researched and implemented application features to aid user experience on the web.
- Translated UI/UX design wireframes to production ready codes.

Terms77 *(still in development)*

A Web App for generating Terms and Conditions and Privacy Policy

- In the course of this project, I developed responsive web pages using HTML, CSS and Javascript.
- Worked on the Backend using Python(Django).
